

AURIGA HONOURED WITH PRESTIGIOUS GLOBAL ATM INNOVATION AWARD

*Ground-breaking WWS ATM Acquiring Software Wins
ATMIA Peter Kulik Innovation Award*

Orlando, Florida 10th February 2022 - [Auriga](#), a global software provider for the omnichannel banking and payments sector, today celebrated the winning of the [Peter Kulik Innovation Award](#) from the [ATMIA](#), the leading non-profit trade association representing the entire global ATM industry. The company received the award for [WinWebServer \(WWS\)](#), its integrated ATM Acquiring solution, at a special ceremony during the [ATMIA US Conference](#) taking place in Orlando, Florida.

The annual Peter Kulik Innovation Award celebrates innovations in the global ATM industry. This ATMIA award recognises new technology breakthroughs that solve major ATM industry challenges such improving ATM security or enhancing the customer experience of digital self-service banking. The award is named after Peter Kulik who chaired ATMIA's hugely influential Next Gen ATM Architecture committee

Auriga's [WWS ATM Acquiring software](#), which won the Peter Kulik award, is a solution that breaks with the older, increasingly restricted, and outmoded methods of integrating ATMs with other banking systems and services.

Auriga's integrated acquiring solution is designed to manage complex ATM networks end-to-end, including advanced self-service systems like Cash Deposit, Recyclers, Assisted Self Service Terminals, ITM and Kiosks. The software implements a smart client / server architecture that makes managing ATM networks significantly more cost effective and productive.

The channel integration model enabled by Auriga's software within its WWS platform delivers much lower total cost of ownership, increased availability, cross-channel capabilities and more efficient maintenance and management of the ATM estate. WWS ATM Acquiring software also enables much simpler, easier, and faster integration with modern banking service channels like video, mobile and web.

Vincenzo Fiore, CEO and founder, Auriga, explains the significance of the technology: "By breaking ATMs and ASSTs out of their silos, they can become a super versatile connected hub for innovative digital banking services that allow banks and ATM owners to innovate with customer services and experience. Transforming the underlying architecture and technologies of the ATM channel is absolutely key for

the future of self-service digital banking and we are so honoured to receive this global industry accolade.”
